1 Reporting Hub

This is the configurable reporting hub screen.

This screen allows you to run any configurable reports that have been assigned to you.

Reports

Reports assigned to you are available in a drop-down list.

You can select one and the screen will display the parameters for that report.

Reports

The parameters displayed are as configured on this report. The screen will validate that required parameters are entered and provide lookups, drop-down lists and calendars to help with parameter entry.

You can clear the parameters, reset to the defaults or run the report from the buttons provided.

When a report is run, this will open in a new tab and display the results.
