## 1.1 Audit Trail section

Each time you make a change to any element of the data and save it, the system keep an audit trail of changes. The screen displays these in a table here. By default, the screen keeps this section closed.

The table displays:

- *User* - the user ID that made the change.
- *Date* - the date and time that the change was made.
- *Description* - a detailed description of what was changed.
