1 Template:LocationZoneSection

1.1 Location Zone section

You can set whether certain location zones are allowed or not allowed.

You can add whether location zones are allowed by clicking the 🗋 **New** button in the section. The screen will display a pop-up window to enter the following:

- *Location Zone* - the location zone code. You can enter the location zone or select it from a list using the ⊞ **Lookup** button to the right of the value entry. The screen will display a pop-up window showing all codes configured in the system. You can find codes by using the Filter box at the top of the pop-up and entering some characters of the code or name. You can enter a code by clicking the entry in the table or cancel by closing the window. You can configure location zones in the Location Zones screen.
- *Allowed* - a check box controlling whether the location zone is allowed.

You can save your changes with the **Save** button, or discard your changes with the **Close** button.

You can delete an existing location zone by selecting the location zone row in the table and then clicking the 🗑 **Delete** button in the section header.
