# 1 PDA Utilities

This section details utilities available through the 🤖 Android operating system that can be beneficial to operators.
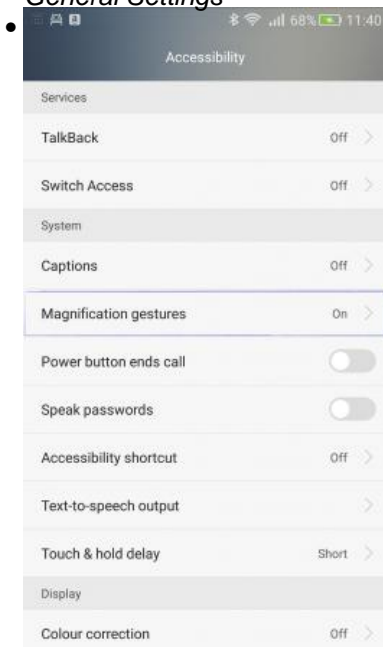

## 1.1 Magnifying the Android Screen

The magnifier is part of the Android operating system and is configured through the Accessibility settings.
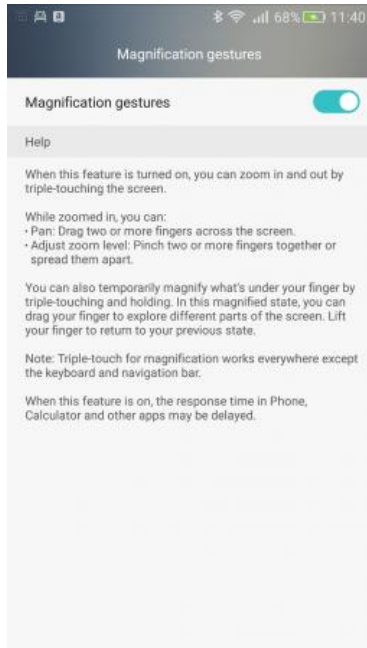

It must be enabled on the device itself.

*General Settings*

*Magnifier Option*
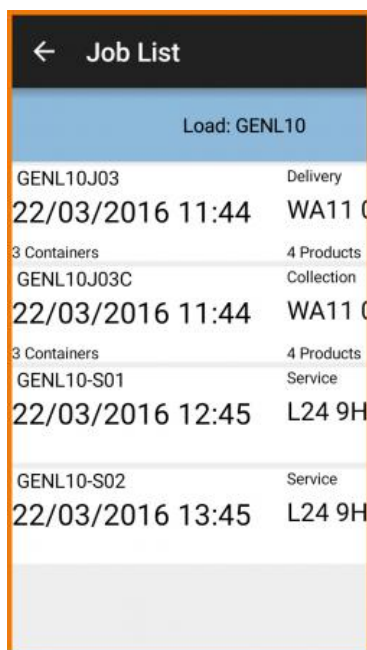

Ready for **What's Next, Now**™

*Magnifier Settings*

A brief description of the magnifier functionality is:

- Triple-tap to enter magnification mode (ignore or disable any warnings).
  - ♦ Use 2 fingers to pan around
  - ♦ Pinch to zoom in or out.
  - ♦ Triple-tap again to exit.
- Triple-tap and hold on the third tap (e.g. tap-tap-hold) to temporarily zoom is whilst touching the screen. Release to zoom back out.
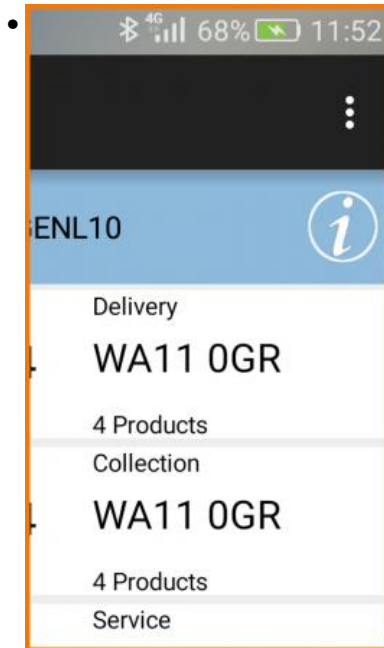

💡 **Note:** This is device and Android version dependent. It has been available since Android 4.2 (Jelly Bean).

*CALIDUS* ePOD Screen Examples:

*Job List Magnified*

Ready for **What's Next, Now**™

- 

*Job List Zoomed*

When the screen is clicked and the application moves to a new screen, the magnifier is automatically turned off.

Ready for **What's Next, Now**™
