

Main Page

Welcome to the *CALIDUS* MCS Assist help pages.

Here you will find all kinds of guides, from simple to advanced, from user guides to technical implementation guides, all to provide as much information on how to get the best out of your *CALIDUS* MCS implementation.

Assuming you are now up and running with your system, why not try to find something you didn't know? Try clicking the 'Did You Know' link below.

Did You Know

That's how Assist works - help broken down into bite-sized chunks, designed to help you make the most of your system. If you're familiar with the web and familiar with Wiki, you're going to find it easy to get around in Assist.

If you're coming here as a new user without a clear idea of how *CALIDUS* MCS works or what it does, you should start with the overview and glossary of terms - that will give you enough information so that you're clear on what we're achieving with this application. You'll find them first in the list below [here](#).

If you're more comfortable with documents rather than web pages, we've got you covered.

Every page here can be downloaded as a PDF (including this one) by clicking the *Download as PDF* link in the toolbar, typically on the left of your browser window. That will give you the PDF of just that page, but if you want something more formal, see the heading below called [Documents](#) - downloading those as PDFs will give you the formal Aptean document. On this page, we've also provided direct links to those document versions - click the [DOC](#) link next to the page.

As you can see, some of the guides are multi-page, so we organise those into categories of pages. Where those pages form a guide themselves (like the Device User Guide), you can use that *Download as PDF* link again from the category to get all the pages in one handy guide.

We keep these pages up to date based on the latest available version of *CALIDUS* MCS - if you see something you like here, but aren't sure whether your version supports it, why not give our team a call? We can advise you on the steps you need to take to upgrade your system to the latest and greatest.

We're constantly updating the system, and that means that we're constantly updating the documentation too. One of the great things about Wiki pages is that the history is kept, so you can click the *View History* link (usually at the top of the page) to see all previous versions of the help page. So, although all the guides are the latest version, you can still access the older pages for reference.

The same is true of any of the pictures that we've uploaded in these guides - click on them and you can see the whole history of that picture. You can download them as well, if you like.

Of course, we also keep PDF copies of the previous version of the documentation when we've finished it, so we can always provide them to you. We've generated them from these Assist pages just like you can - because it's that easy to

use.

Below you'll find a link to all the guides in this Assist system.

CALIDUS MCS Overview

CALIDUS MCS is a mobile website application designed to extend CALIDUS TMS.

- [Overview](#)
- [Glossary of Terms](#)
- [Did You Know](#)

Guides

- [Device User Guide DOC](#)
- [C-TMS User Guide DOC](#)
- [Setup and Configuration DOC](#)
- [OV 320722 CALIDUS MCS Device Advanced Guide DOC](#) comprising:
 - ◆ [Device Cleardown](#)
 - ◆ [Refresh MCS](#)

Documents

All documents can be found here:

- [Category:Documents](#)

[UG 320722 CALIDUS MCS Device User Guide DOC](#)

[UG 320722 CALIDUS MCS C-TMS User Guide DOC](#)

[OV 320722 CALIDUS MCS Installation Guide DOC](#)

[OV 320722 CALIDUS MCS Technical Guide DOC](#)

[OV 320722 CALIDUS MCS Processes DOC](#)

[OV 320722 CALIDUS MCS Setup Guide DOC](#)

[OV 320722 CALIDUS MCS Device Advanced Guide DOC](#)

Releases

All of the release notes for the system can be found here:

- [Releases](#)

Coming Soon

This section contains guides that are in progress. Typically, they might be incomplete or less detailed than needed. We'll link our new guides here, whether we've finished them or not. That way you can see what's around the corner.

-

We also categorise any pages that are considered incomplete. These pages may not be listed above, as they are not new or upcoming guides, but they generally need a little more work to get them to their full potential.

You can find the list here:

- [Incomplete Pages](#)

Technical Details?

- [Category:Developer Guides?](#)
- [MCS Process Flows DOC](#)

New Users

Note: For new users of *CALIDUS* Assist:

Go to the [My Preferences](#) link and click on the Editing tab. Check the "Prompt me when entering a blank edit summary" check box and save the settings.
