FS-262532 ID-AA-7Q3HFY Display last login on Web Portal

2 FUNCTIONAL OVERVIEW

2.1 Client Requirement

Display the last login date-time of the user in a Track & Trace portal. Aramco has requested to display a last logging date-time when user login into the portal. This request is to alert user if account is used by another person. This request is same we can see when we login into our bank account and system displays a last login date-time.

2.2 Solution

Once the user has logged in, the initial screen displayed to them will display the last date/time that they logged in. The users record will be read and the last login date stored prior to it being updated with the current login date and then be used to be displayed to the user. The format of the last login display will be as follows:

Last visit: Tuesday 17 March 2009 at 5:56 pm

2.3 Scope

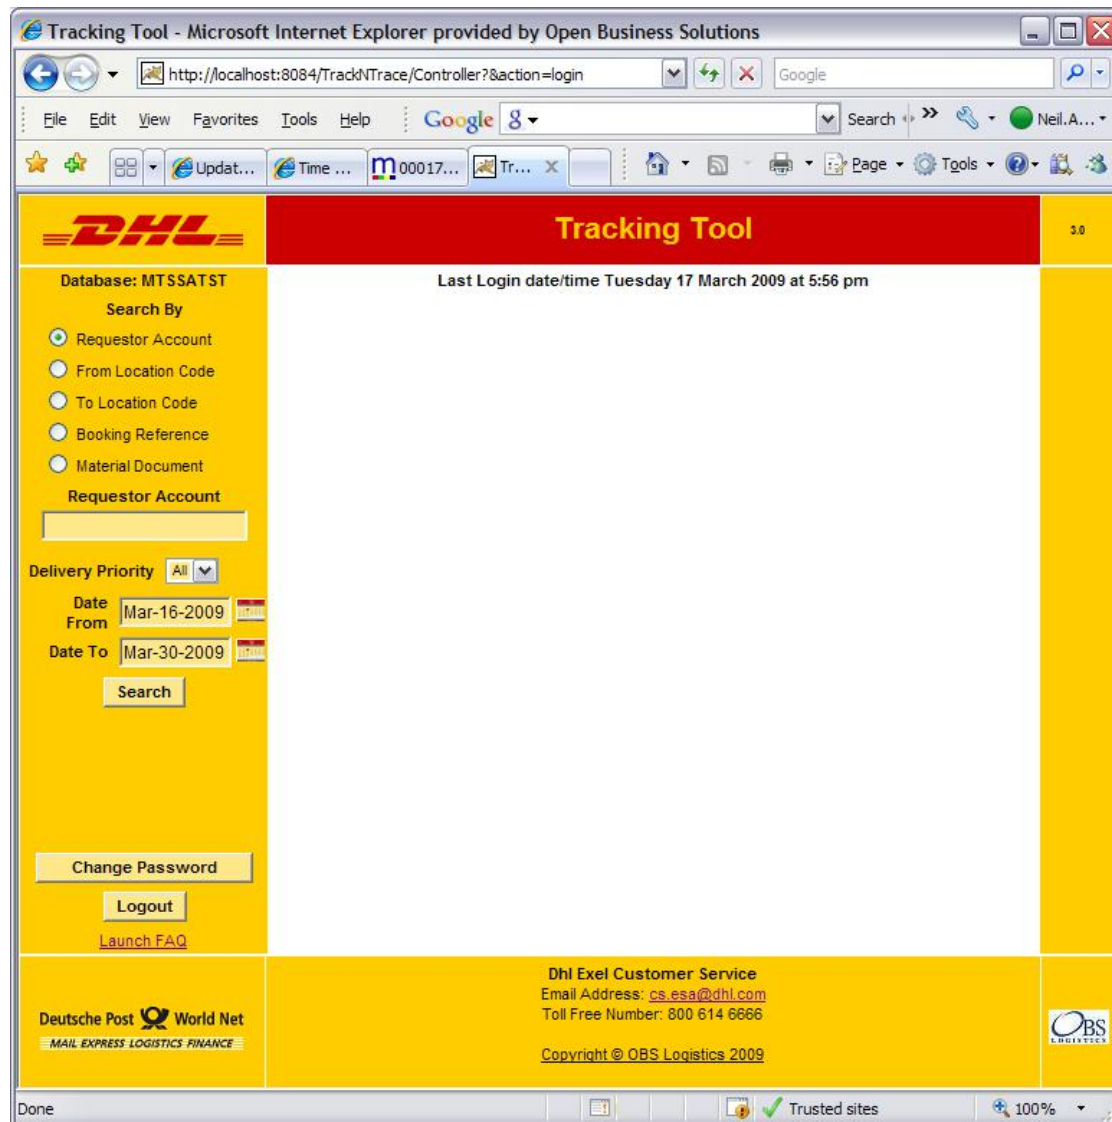

This change will be applied to system version 10.6 (MTS) and version 3.0 (Tracking Tool)

3 FUNCTIONAL DESCRIPTION

3.1 Tracking Tool Web Application

The initial page displayed will now display the last login date/time.

The last login date/time will also be displayed on the change password screen if the user is forced to change their password on login
