3 FUNCTIONAL OVERVIEW

3.1 Client Requirement

We need to change the mapping of data for the export out of IIPF for Tesco's - without changing the structure of the existing export. Martyn Mann/Daventry/UK/Exel.

On the export we extract Trailer ID from the trip - we need to keep the same heading, but the data needs to be taken from the Crew 2 field within the trip. This is a short term fix to allow the correct data for Sea shipments to go to Tesco's as the Trailer ID field cannot be increased to allow full vessel name + this has the added benefit of having a dropdown selection to ensure the correct data is sent.

3.2 Solution

The existing Purchase order export will be altered to accommodate the changes required. The Trip Trailer ID field will now be taken from the Crew 2 field (see trip screens). The trailer id column on the interface table will be increased in size to allow these new values to be stored.

3.3 Scope

This change will be applied to system version 10.5.

4 FUNCTIONAL DESCRIPTION

The existing export will be altered to display the crew 2 field as the trailer id. The crew 2 field will contain the vessel name.

The screenshot shows the 'Trip Manipulation' window with the 'Trip Detail' tab selected. The 'Crew 2' field is highlighted with a red box and contains the text 'PARKER, CHRISTOPHE'. Below the trip details, there is a table with columns for CMS, Customer, Booking Ref, From, To, Collect From, Until, Deliver From, Until, Weight, and RPE. The table contains several rows of data, including bookings for DHL and Tesco.

CMS	Customer	Booking Ref	From	To	Collect From	Until	Deliver From	Until	Weight	RPE		
991775	DHL STOCKPOR	DHLASTOC	DHL Adidas Stock	IDSPPETE	Peterline_J D Sport	12/03/09 03:00	04:00	12/03/09 09:00	10:00	26000	6.00	
993322	TESCO	MJCP05000000	AFRODIT	AFRODIT TURKEY	TESCCHES	Cheshunt_Tesco S	12/03/09 00:00	23:59	19/03/09 00:00	23:59	4900	49.00
993342	TESCO	DNGP0300000	AFRODIT	AFRODIT TURKEY	TESCCHES	Chesterf_Tesco Dic	12/03/09 00:00	23:59	19/03/09 00:00	23:59	1500	2.50

The value in this field will be displayed as the trailer id on the Purchase Order Message in the <TRAILER_ID> tag within the <TRIP_TRACKING> segment.

Once the vessels have been set up against the drivers, this field and the export will show the vessel.
