3 FUNCTIONAL OVERVIEW

3.1 Client Requirement

Add 2 x Fields to CTMS report Allan Butterworth/St Albans/UK/Exel. CN Trip and Order detail export report - add 2 x fields - [KM from previous Stop] and [Stop type] between [Stop No] and [Planned Arrival] Gives the ability to determine Empty Distances

3.2 Solution

The Stop Type already exists on the export in between Stop No and Planned Arrival. Therefore this change is to add the additional field ?KM from Previous Stop? this will be populated from the DISTANCE_FROM_PREV_STOP field on the SCH_TRIP_STOP table. This will mean a change is needed to the CSV package in the WRITE_CN_TRIP_ORDER_DETAIL procedure. The selection cursor will need to be changed along with the export output.
