3 FUNCTIONAL OVERVIEW

3.1 Client Requirement

On the debrief screen additional information is required, the cases ordered, the cases despatched and the number of lifts. The headings on this screen are not clear and need identifying. "actual despatched" should show actual despatched cases, "actual deliver" should show Actual delivered cases, actual deliver lifts. This is essential as some contracts charge at lift level some at case.

3.2 Solution

The following columns will be renamed on the Trip Debrief Form ?Order Debrief? tab

Actual Cases	- Delivered Cases
Actual Weight	- Delivered Weight
Actual Volume	- Delivered Volume
Plan	- Plan DU Qty
Actual Despatch	- Despatch DU Qty
Actual Deliver	- Delivered DU Qty

The following columns will be renamed on the Trip Debrief Form ?Order Items? tab and for consistency also on the Orders form ?Order Items? tab:

Ordered	- Plan Cases
To Deliver	- Despatch Cases.
Delivered	- Del Cases

The renaming of the columns will be dependant on a system registry so as not to impact other clients.

3.3 Scope

This change will be applied to system version 10.5.

3.4 Data

New system registry ?CHANGE_DEBRIEF_LABELS? will be added to control the display of the debrief labels.

4 FUNCTIONAL DESCRIPTION

4.1 Trip Debrief Form - Order Debrief Tab

The following items will be renamed on the order debrief tab:

Actual cases – Delivered Cases
 Actual Weight – Delivered Weight
 Actual Volume – Delivered Volume

Plan – Plan DU Qty
 Actual Despatch – Despatch DU Qty
 Actual Deliver – Delivered DU Qty

4.1.1 Trip Debrief Form - Order Items Tab

The following items will be renamed on the order items tab:

Ordered - Plan Cases
 To Deliver - Despatch Cases
 Delivered - Del Cases

4.1.2 Orders Form - Order Items Tab

The following items will be renamed on the order items tab:

Ordered - Plan Cases.
 To Deliver - Despatch Cases.
 Delivered - Del Cases

The renaming of the columns will be dependant on a system registry so as not to impact other clients.

The original database column names will not change and so there will be no resulting change to any other part of the system which references these original columns. They will function as current. No new database columns are to be added as part of this change.

Any further reference names to these columns will not be changed as part of this RIO, for example existing reports and extracts. These will be handled as further requests if required.

NOTE RIO : KM-8A7K9Y will include making the order items tab a configurable layout so it may look different to above screen shots
