# Changes to Location Extract

FUNCTIONAL SPECIFICATION - 10.6

- 0.1

Reference: FS 287319 MW-8BNLRX

## 1.1 Client Requirement

### Change Request Summary:

Changes to the Locations extract.

### Change Request Details:

Add the 1st 3 contact details to the existing output.

### Benefits identified as a result of the change:

Removes the requirement to keep the existing spread sheet supplier contact details.

## 1.2 Solution

The existing location extract includes the following data:

Location\_Id, Location\_Name, Depot, Address\_Line1, Address\_Line2, Address\_Line3, Town, County, Country, Country\_Code, Postcode, Postal\_Region, Planning Region, Cost\_Centre\_Name, Lat., Long., Loading\_Rate, Unloading\_Rate, Inactive, Created By, Created Date

The following data will be added after ?Created Date? for the first three lines displayed in the ?Contacts? tab page of the ?Locations? screen:

?Surname?, ?Forename?, ?Job Title?, ?Phone?, ?Email?.

These contacts will be repeated with the suffix ?1?, ?2? or ?3? to indicate which contact information is being displayed.

The first three lines will be taken using the ?ID?, i.e. the sequence in which the contacts have been added for the location and the sequence in which they are displayed in the screen.

## 1.3 Scope

This change will be applied to system version 10.6.0 on IIBTST and once approved IIBPRD.

## 2 Set-up

### 2.1 Pre-requisites

None

### 2.2 Menu Structure

?Unchanged?

### 2.3 Data

The report parameter for the ?Location Export? will need to be updated to run procedure ?LOCATION\_EXPORT? in package ?DP\_CSV2?.

## 3 Functional Description

The database procedure ?LOCATION\_EXPORT? will be added to package ?DP\_CSV2? with the same name and parameter list.

The report parameter ?REP\_REPORT.PROC\_NAME? will be changed to run the procedure from the package.

The following data will be added to the ?Location Export? after ?Created Date? for the first three lines displayed in the ?Contacts? tab page of the ?Locations? screen:

?Surname?, ?Forename?, ?Job Title?, ?Phone?, ?Email?.

These contacts will be repeated with the suffix ?1?, ?2? or ?3? to indicate which contact information is being displayed.

The first three lines will be taken using the ?ID?, i.e. the sequence in which the contacts have been added for the location and the sequence in which they are displayed in the screen.

The data will be obtained as follows:

Item	Table	Column
Surname	GEO_CONTACT	SURNAME
Forename	GEO_CONTACT	FORENAME
Job Title	GEO_CONTACT	JOB_TITLE
Phone	GEO_CONTACT	PHONE
Email	GEO_CONTACT	EMAIL

A new cursor will be created to obtain the 3 contacts for the location in a new loop run within the existing loop that obtains each set of location details.

The headings will now be displayed as follows with commas as delimiters:

### Heading

Location\_Id  
 Location\_Name  
 Depot  
 Address\_Line1  
 Address\_Line2  
 Address\_Line3  
 Town  
 County  
 Country  
 Country\_Code  
 Postcode  
 Postal\_Region  
 Planning\_Region  
 Cost\_Centre\_Name  
 Lat.  
 Long.  
 Loading\_Rate  
 Unloading\_Rate  
 Inactive  
 Created By  
 Created Date

Plus the new items for the contacts:
