OUTBASE NAME	LOCATION_NAME	GEO_LOCATION
JOURNEY REFERENCE	TRIP ID	SCH_TRIP
DRIVER CODE	DRIVER_ID	SCH_TRIP

The extract will be developed into the standard CSV processing package., A new procedure to select the data and a new procedure to write the data to the extract file will be added to the existing program.

Two new fields will be added to the reason code static data table (SCH\_REASON\_CODE) to indicate who is at fault for specific reason codes. The data will be maintained using the Business Data Management screen:

## Table Updates Required

```
ALTER TABLE SCH_REASON_CODE
```

```
ADD COLUMN AT_FAULT VARCHAR2(12);
```

```
