# 1 Help:New pages

Template:PD Help Page

**New pages** is a [special page](#) that lists recently created pages in reverse order of creation, with creation date and time, current size, user who created the page, and first [edit summary](#). It also provides links to [patrol](#) these new pages when that feature is enabled.

This feature is accessible at [Special:NewPages](#). The page results are not adjustable in the [Preferences](#).

The ability to filter by user was added in [bugzilla:6448](#).

## 1.1 Transclusion

This special page can be [transcluded](#), with the first unnamed parameter specifying how many entries should be displayed.

```
{{Special:NewPages/50}}
```

Additional parameters may be used in a comma separated list such as:

```
{{Special:Newpages/limit=5,shownav,offset=20081210,namespace=Template}}
```

| parameter     | value type | description                                                                                                                                       |
|---------------|------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| limit         | integer    | Number of entries to display                                                                                                                      |
| offset        | date       | Date to begin the list of entries                                                                                                                 |
| namespace     | string     | Restrict the results to the named <a href="#">namespace</a>                                                                                       |
| hideliu       |            | Hide logged in users (LIU)                                                                                                                        |
| hidepatrolled |            | Only show pages which have not been <a href="#">patrolled</a> .                                                                                   |
| hidebots      |            | Hide <a href="#">Bots</a>                                                                                                                         |
| showredirs    |            | Show <a href="#">Redirects</a>                                                                                                                    |
| shownav       |            | Display result navigation links above and beneath the results, i.e,<br>"(Latest   Earliest) View (newer 5) (older 5) (20   50   100   250   500)" |
