# 1 Invoices

C-TMS can be configured, so that a customer invoice can be generated, once **Trip Debrief** has taken place.

## 1.1 Customer Setup

Customers can be set up so that they can use BCI (Base Cost Invoicing) or ACI (Actual Cost Invoicing).

If a customer changes from BCI from ACI, then a BCI Start Date MUST be entered, this allows the system, to know when to start generating payments using the Base Cost amount instead of the Actual amount.

Customers can also be configured to use Provisional Invoicing, this method generates a provisional invoice consisting of trips which have been **ACCEPTED**?, another invoice, called adjustments will be generated, several weeks later, which again is configurable.

## 1.2 Configuration Form

Invoicing is configured within the Invoice Requirements tab of the **Accounts** form

## 1.3 Invoices

TMS has functionality that allows the user to cumulate all payment lines within a selected date range and place onto an invoice. Invoices comprise of payment lines where each payment line will contain details of the specific order. Invoices can be generated weekly or monthly or to a specific date schedule.

To access the invoices screen, go to C-TMS Modules, Finance, Invoices.

It is possible to view the itemised breakdown of the invoice by double clicking into it and selecting "both".

The screenshot shows the 'Payments for Invoice 1' window. The 'Both' column in the table is highlighted with a red box. The table has the following columns: Detail, Summary, Both, Currency, Date From, To, and Status. The 'Status' column shows 'ActualForecastInvoice'.

## 1.4 Invoice Date Ranges

Invoices can be set to be generated on a set frequency as required by the customer - example below:

From: Sunday 00:00

To: Saturday 23:59.

This is a configurable setting within TMS and can be amended in the Accounts maintenance screen - located in C-TMS Modules, Maintenance, Accounts Maintenance.

To amend the date range, select the **Edit** option. You can then amend the Invoice Period and the Day in the Period the invoices are created:

## 1.5 To send an invoice to a customer

Once an invoice has been reviewed, it can be approved and sent across to the customer in the following way:

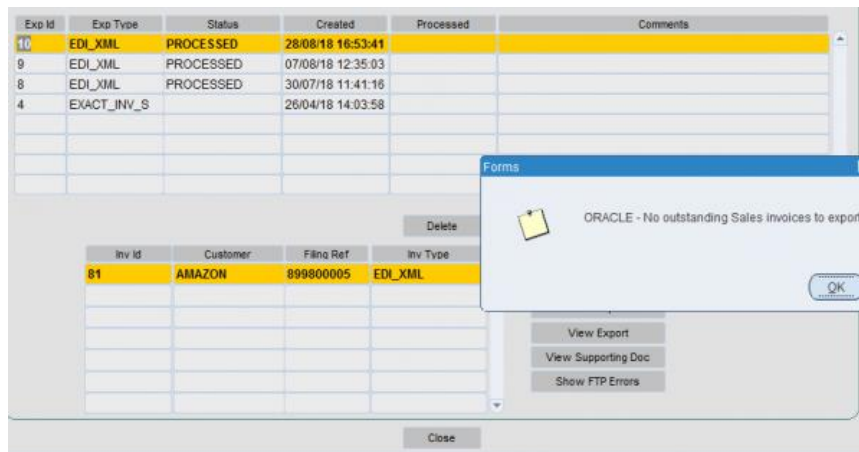

- Highlight the invoice to be sent
- Once reviewed, set the relevant invoice status from Draft to Approved - this is achieved by right clicking on the line, select **Set Status** and select **Approved**.
- Select **Exports**.

- Select **Generate Export**

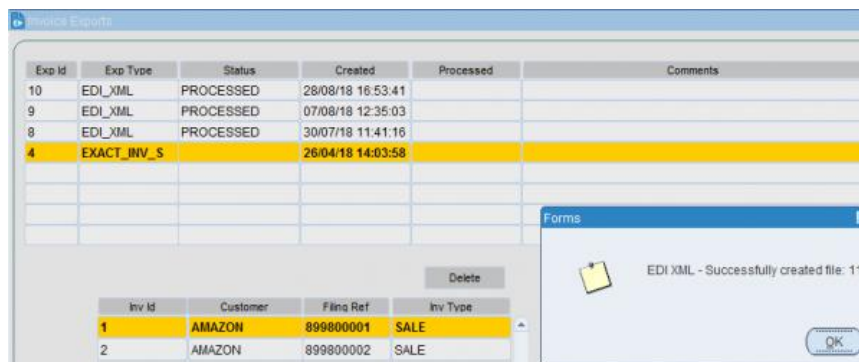

- Select **OK**. You will see the screen below:

- Select **OK**.

- You will then see the "successfully created file" message as above.
- The next stage is to select the **Send Export** button - this will set the status to "Processed".
- This is the trigger point that will send the invoice across. The invoice will display as "Processed" - as below.

Exp ID	Exp Type	Status	Created	Processed	Comments
11	EDI_XML	PROCESSED	08/10/18 10:57:36		
10	EDI_XML	PROCESSED	28/08/18 16:53:41		
9	EDI_XML	PROCESSED	07/08/18 12:35:03		
8	EDI_XML	PROCESSED	30/07/18 11:41:16		
4	EXACT_INV_S		26/04/18 14:03:58		

Inv Id	Customer	File Ref	Inv Type
4	AMAZON	899800006	EDI_XML

**Note:** There is specific setup required beforehand to ensure that the relevant customer will receive the invoice in the required format.

If the push of the file fails, users may view the FTP Errors to find out why the extract failed.

Export ID	Error	Datetime
-----------	-------	----------

From this form, the invoices can be printed or exported to a CSV file.

C-TMS provides the ability to see the savings generated for a particular date range for a particular customer. This can then be exported into a CSV file.

## 1.6 View Export and Supporting Docs

Once an invoice has been generated, it will be displayed first in the top data block. You may then select **View Export** to see the payments that will be posted when the export is sent. Selecting view will automatically display the header for the selected.

You are also able to view the details of the export, this includes details of the items for which payments have been generated. When selecting the **View Supporting Doc** button, the following screen is displayed, You enter the export id and select a customer, to view the payment details.

The support documents will run for a single customer, where the customer has at least one invoice included in the export. If the customer selected does not have an invoice in the export, the supporting doc will be blank.

## 1.7 Profit & Loss

The oracle report suite (**Reporting & Extract Suite**) allows data to be extracted into CSV. A **Profit and Loss** report can be created. Once created, this can be run daily, weekly or monthly and will show all inbound and outbound payments within a specific time frame.

By amending the Credit account, you can extract costs and then revenue separately.

The criteria below shows all revenue payments allowing the data to be totalled in CSV format.

The screenshot shows the Oracle Reporting Suite interface. At the top, the title bar reads "Oracle Reporting Suite" and "ORS v1.26 C-TMS v12.26". Below the title bar, there are dropdown menus for "Report Type" (set to "ORD\_IN\_INV"), "Report Level" (set to "ORD\_IN\_INV\_DATA"), and "Saved Reports" (set to "PROFIT-LOSS"). There are buttons for "Refresh", "Create Output", and "Close".

The main area contains a table with columns: Level, Title, Displayed Title, Set From, To, Sort, Req Seq, Inc Count, Sum Grp, and ByMthly. The table lists various data points for the "ORD\_IN\_INV\_DATA" report, including Customer Ref, Credit Account, Debit Account, Event Ref, Revenue Date, Invoice Due Date, Payment Amount, Payment Status, Currency, Payment Type, and Invoice Id. The "Revenue Date" row is highlighted in yellow, showing a date range from "01/06/18" to "29/06/18".

At the bottom of the table, there are buttons for "Clear All Selection Criteria", "Include All", and "Include None". Below the table, there are buttons for "Save Selection", "Copy To User", and "Delete Report".

## 1.8 View invoice details

It is possible to view the itemised breakdown of the invoice by double clicking into it and selecting "Both"

The screenshot shows the "Payments for Invoice 1" interface. At the top, there are tabs for "Detail", "Summary", and "Both", with "Both" selected. There are dropdown menus for "Currency" and "Date From" to "To". There are buttons for "Refresh" and "Export".

## 1.9 Invoice Generation and Printing
