# 1 Layout Configuration

Several forms allow you to configure the layout of tables, including or excluding elements up to a maximum width.

How this is accessed depends on the screen:

- Right-clicking on a table may show an option "Configure ..." or similar - clicking this will show the Configure Layouts panel.

Column	Curr Width	Min Width	New Width
ITEM_IDENTIFIER	74	45	
PROD_TYPE_ID	48	40	
ITEM_AKA_CODE	48	40	
ITEM_DESCRIPTION	121	15	
ITEM_FACTOR	42	20	
LIFTS	36	20	
STACK	30	20	
QTY_ORDERED	42	20	
QTY_TO_DELIVER	42	20	
QTY_DELIVERED	42	20	
ORDER_DIFFERENCE	42	20	
WEIGHT	40	20	
VOLUME	40	20	
CURRENT_LOCATION	50	25	
SAP_LINE_NO	50	15	
DU_TYPE	50	50	
PALLET_ID	48	50	
DIMENSIONAL_WEIGHT	40	20	
UNITS	68	20	

Current selected width: 697  
Maximum allowed width: 750

OK Delete Cancel

The Configure Layouts pop-up will show all of the items that can be configured to be shown or hidden.

You can select or deselect items to be shown by control-clicking on the elements in the table.

When you are configuring tables, you will also be shown the current and minimum width of the item, plus the maximum width of the table. Once you have selected an item, you can change the width of the displayed items with the New Width box, up to the maximum width of the items in the table, which is shown at the bottom of the form.

You can name the layout using the text box at the top of the screen, and set this layout as the default. This is optional, but means that you can have multiple layouts that you can select from to configure the screen best for a particular task.

You can save and apply the layout with the **OK** button. The layout is stored in the system against your user, so you will be able to access the layout from anywhere you access the system.

You can cancel your changes with the **Cancel** button - the form will exit and the layout will not be saved or changed.

You can delete the currently-selected layout by clicking the **Delete** button.

Usually, in screens that allow configuration, there will be a drop-down list situated on the screen to allow you to quickly select configurations for that table or section.

List of screens with configurable layouts:

- Orders/New Order

- ◆ Order Items
- ◆ Trip Details
- Planning/Trip Manipulation
  - ◆ Stops
  - ◆ Order Well
- Trip Debrief
  - ◆ Order Debrief
  - ◆ Order Items
- Carrier Trip Planning
- Trip Overview (Waterfall)
