1.1 Message Monitoring Form

The message monitoring form allows a user to choose a date and view all the messages that have been created on that day. The user can filter the messages using one or many of the following filters; the event that created the messages, the message type, the medium by which it is being distributed, the status of the message and if required the user can also search for the event reference of the message. The user is then also able to sort the results by created time, sent time, address value and subject.

An archive version of this form has also been created which will allow users to view archived messages.

The screenshot shows the 'Message Monitoring' application window. At the top, there's a title bar and a menu bar. Below the menu bar, there are input fields for 'Date' (17/10/14), 'Recipient Type Id' (CARRIER), and 'Recipient Id'. A 'Refresh' button is next to the 'Recipient Id' field. Below these fields is a table with columns: Event, Search Ref, Message Type, Medium, Status, Recipient Id, Electronic Address, Created, Sent, and Concat. The table contains three rows of data. Below the table, there are sections for 'Attachments', 'Error Detail', 'Sending Email Address' (your.email@obs.com), and 'Subject' (Transport Offer - Ref.Colindale Blood Centre to Colindale Blood Centre). At the bottom, there are buttons for 'Forward', 'Re-Send', 'Cancel', and 'Close'.

Event	Search Ref	Message Type	Medium	Status	Recipient Id	Electronic Address	Created	Sent	Concat
