1 Network

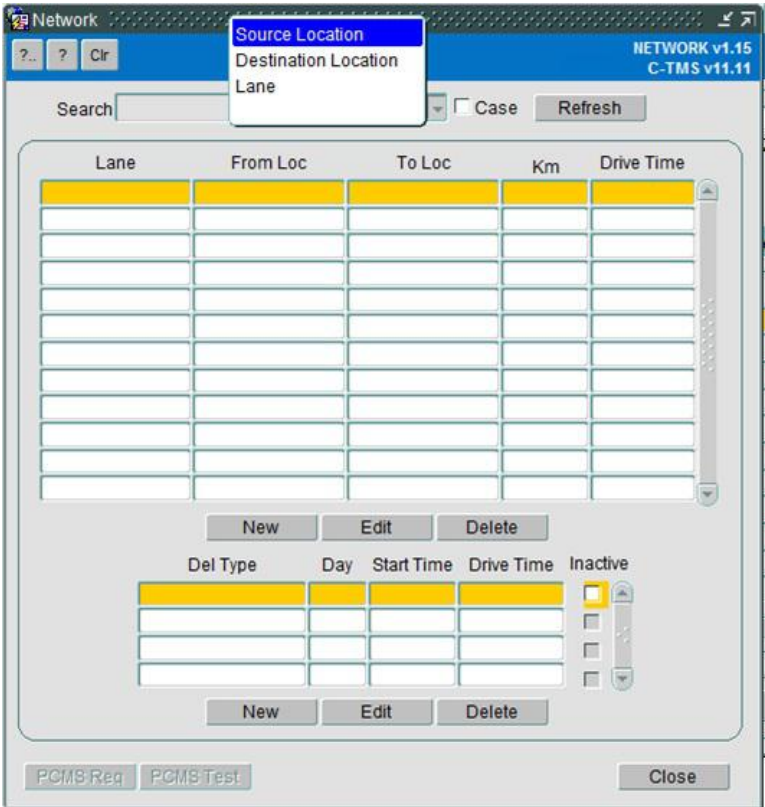

Network Tables are used to maintain the Distance and Time between two locations in C-TMS.

Network Tables are accessed from Maintenance Menu.

1.1 Query Existing Points To Points

The Network Table can be queried based on the Source Location or the Destination Location. To query on the Source Location, just select the 'Source Location' from the search criteria drop down box and enter the source location in the 'From Loc' and click on the query button as shown below:

Network v1.15
C-TMS v11.11

Search Source Location

Lane	From Loc	To Loc	Km	Drive Time
	C1			

Del Type	Day	Start Time	Drive Time	Inactive
				<input type="checkbox"/>
				<input type="checkbox"/>
				<input type="checkbox"/>

The same steps needs to be followed to query on the Destination Locations, except that the search value should be entered in the 'To Loc' field.

1.2 Create New Point To Point

To create a new Point to Point network table, click on the **New** button and enter the details. Once you have entered the details, click **OK** to save the new point to point details of distance and time.

Network detail

From Loc

To Loc

Distance Driving Time: Days Hours Mins

Del Type	Day	Start Time	Drive Time	Inactive
				<input type="checkbox"/>
				<input type="checkbox"/>
				<input type="checkbox"/>

The newly created network table details are shown
