1.133 Location Pre-Warning

This report shows the Collection and/or Delivery activities for a given Depot. The parameters used to restrict the results for this report are as follows: Date Range, Trip Status: ALL or Accepted, Load Type: Collected, Delivered or Both, Depot: the list of locations available to the user is determined by whether the operation is using the Lane Based Order mechanism and whether the user is assigned the LBO_TRACKING user parameter. In this case, the list of locations will be based on which lanes the user is authorised to see. If the Lane Based mechanism is not being used by the operation, then the list of depots will be a combination of the Based-at user parameter and the locations set up by the Customer/Customer Group mechanism.

Parameters:
