1 Web Services Audit Enquiry

The screen is available from the Administration, Interface.

This displays bespoke web service auditing.

The screen displays the audit trail captured from each web service call processed by the users.

There is selection criteria available as fields at the top of the screen:

- Ref Type
- Ref Value
- Activity
- User
- Date

The selection criteria will then be used to display the relevant audit transactions recorded in columns with the following headings:

- Audit
- Ref Type
- Ref Value
- Activity
- User
- Date
- Response Message - this is value of the XML created and may be viewed in a separate adjacent window to the right of the audit fields.

Clicking **Close** will close the screen.

Note: None of the information displayed may be changed or deleted, nor may any records be added.
