EMERGENCY RELEASE - CTMS 11.0

RELNOTE ER015-023

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks	Reporter
ORDERS.fmx	Orders Form	2.309	325548	-	3	Order Line Consolidation Parameter - The consolidation of duplicate order lines will be controlled by a cost-centre-level system parameter called OMS_CONSOLIDATE_DUPLICATE_LINES. The database script will create the new cost-centre-level system parameter called OMS_CONSOLIDATE_DUPLICATE_LINES to control the consolidation of duplicate order lines during order entry. Duplicate order lines will be consolidated when a new order is validated and it is updated to status UNSCHEDULED or when it has its order items generated automatically. A duplicate order line will be a combination of product type, DU type, commodity type, commodity class, height, length and width for the dimensions of the DU type. It will not be possible to enter in the Order Detail screen a duplicate order line after an order has been created because the original order line can be updated to generate the new items as they are required.	Paul Roscoe
