EMERGENCY RELEASE - CTMS 11.0

RELNOTE ER019-017

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks	Reporter
TIU_TRIP_STATUS.sql	Trip Status Database Trigger	5.39	333530	DS-A76DXR	1	The following changes will need to be made to the EDI process to produce an electronic manifest, for example: Triggers: Type - STATUS, Value - TENDERED (and/or ACCEPTED) Parameters: Param - PROCESS_INTERVAL, Value - 60 N.B. Changed to a parameter from a report value in FS. The electronic manifest will be triggered as at present when the trip is updated to EN-ROUTE. The electronic manifest will also be triggered when the trip is updated to a status listed for the EDI trigger and when an order is assigned to, or removed from, a trip that is EN-ROUTE or listed for the EDI trigger. The EDI parameter for the interval will be used to only send a new electronic manifest when a previous file has been sent for the trip when the interval has elapsed. The EDI parameter will not be used when the trip is EN-ROUTE so that the external carrier is informed immediately of any changes at that status.	Denis Starodubov
