EMERGENCY RELEASE - CTMS 11.0

RELNOTE ER019-058

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks	Reporter
DATA_1_IMP_IMPORT_TYPE_REC_TYPE_333205.sql	Database Script	1.1	333205	KH-A6QRRQ	3	The LOCATION import process will have the Alternative Code available to store against the new location and the ability to store multiple reference values. The Alternative Code may be a maximum 12 characters in length. The reference codes must exist as decoded values for type LOC_REF_NAMES and the reference values may be a maximum 200 characters in length. Both the Alternative Code and the references are optional values for the new loation. The new location will still be created if its data is valid at the header level but it contains invalid data that is rejected for the trailer, constraint, contact or reference levels which are optional.	Kate Hunter
