EMERGENCY RELEASE - CTMS 11.0

RELNOTE ER020-003

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks	Reporter
DATA_ADM_SYSTEM_PARAM_335576.sql	Data Script	1.1	335576	-	3	If the new system parameter called 'LOTS_PREVENT_MULTI_VLI_VUI' is set to 'Y' then the 'VLI' and 'VUI' files for LOTS/Portal will only be re-sent for an order on a trip should either of the actual arrival or actual departure times be set for the first time for the trip stop. A file can be sent twice for the same order on the same trip but only of the actual times are set separately. If the new system parameter does not exist or it is set to 'N' then multiple files will be generated whenever the actual arrival or actual departure time is updated for the trip stop.	Michelle Naumovski
TRG_STS_XML.sql	Trigger	5.19	"	"	"	"	"

New Parameters			
Parameter Name	Config Level	Setting Value	Result
LOTS_PREVENT_MULTI_VLI_VUI	SYSTEM	Y	The 'VLI' and 'VUI' files for LOTS/Portal will only be re-sent for an order on a trip should either of the actual arrival or actual departure times be set for the first time for the trip stop. A file can be sent twice for the same order on the same trip but only of the actual times are set separately.
LOTS_PREVENT_MULTI_VLI_VUI	SYSTEM	N	Multiple files will be generated whenever the actual arrival or actual departure time is updated for the trip stop.
