EMERGENCY RELEASE - CTMS 11.0

RELNOTE ER020-098

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks	Reporter
DP_SCHEDULING_ENGINE.sql	Scheduling engine package	5.93	337350	-	1	The scheduling engine has been changed to handle exceptional errors that invalidate the savepoints and thus do not rollback the data for orders that have been partially scheduled. The orders will then not be at SCHED_COLL status. The audit records will indicate that the order has been unsuccessfully scheduled. If an order is partially scheduled and it cannot be rolled back successfully, the order will remain at status SCHED_COLL but an appropriate audit record will be created for reference. The exceptional error is being triggered by a process external to the scheduling engine so the scheduling engine has been changed to account for such failures to ensure that the orders are reset if possible.	Michelle Naumovski
