EMERGENCY RELEASE - CTMS 11.0

RELNOTE ER021-019

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks	Reporter
INT_ERR.fmx	Interface Errors Form	1.96	337798	-	3	<p>The Customer Orders In tab page in the Interface Errors screen will display the Created Date and the Updated Date for the interface records in the local timezone for the user.</p> <p>The query will assess the filter for the date range for the local timezone.</p> <p>If the timezones are not active in the database or the user does not have a timezone specified, the records will continue to be assessed for the system date and time.</p> <p>The Customer Plan file will indicate in the original validation message for the header record that there are errors detected in the detail records.</p> <p>If there are any errors detected in the detail records, the header record will be updated to status FAILURE to match the detail record status.</p> <p>The file will be moved to the failures directory instead of the archive directory if none of the header and detail records have been extracted and validated successfully.</p> <p>The shipment type can now be C as well as R if it is provided.</p>	Dave Meir
