EMERGENCY RELEASE - CTMS 11.0

RELNOTE ER021-040

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks	Reporter
AT_ORG_CUSTOMER_337378.sql	Alter Table Script	1.1	337378	-	3	A new flag for the customers is available in the Sched Thresh tab page in the Customers maintenance screen. This flag will enable the customers to create orders with time windows that allow the order to be collected and delivered on the same trip via the network scheduling engine if the collection and delivery locations exist sequentially on the same radial route and the current time meets the cut-off times for collection and delivery at the route stops. The schedule rules will need to be setup to allow the orders for the customer to be collected and delivered in the same day for standard orders without first being collected into the depot for delivery on the next working day. There can be multiple schedule rules being assessed for the customers that allow standard orders to be collected and delivered on the same day. The import process for the schedule rules will allow multiple schedule rules to be created for these customers if they have different cut-off times.	Michelle Naumovski
