EMERGENCY RELEASE - CTMS 11.0

RELNOTE ER021-083

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks	Reporter
INT_XML_IN.sql	Inbound EDI Package	5.151	338814	-	1	The XML orders will reassess the derived fast order collection time windows: If the early and late dates are the same day the early time will be the current time and the late time will either be 18:00 or half an hour after the early time if the current time is later than 18:00. If the late time at half an hour after the early time will be after midnight the late date and time will be offset to 00:30 the following day. The delivery date will be calculated from the late collection date if it is after the early collection date based on the offset days and the cut-off time of the schedule rules, the early collection date and time will then be offset to 07:00 on the same day as the late collection date. The new locations for the UNKNOWN locations will assess the suffix as '_{COUNT}' as 001-999 or 1000-9999 based on the existing locations having the format above as numbers only.	Michelle Naumovski
