ORDERS.fmx	Orders Screen	2.378	338703	NA-AEQK6C	1	A new EDI parameter EVENT_ACTION has been created to set the first value of the EVENT_ACTION field for a given trip.	Naved Akhtar

						Also a new system parameter has been created 'REBOOK_ALT_STATUS' which prevents the status of rebooked orders being changed, prevents the original item identifier from being prefixed with an X and moves items contents to the new order. The 'REBOOK_ALT_STATUS' parameter also enables the new features within the CN DATA EXTRACT and prevents microlise from removing the R{COUNT} suffix.
