EMERGENCY RELEASE - 11.0

RELNOTE ER025-056

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks	Reporter
DP_SCHEDULING_ENGINE.sql	Scheduling Engine Package	5.122	345244	-	3	Changes to the network routing for trunk trips to account for airports not only being used for their local deliveries but also to transit orders to other depots via their local airports. The assessment at the AIRPORT locations will search for an onward flight route if the order has been last at an RDC, or an airport collection route if the order has been last at another airport. The road hubs are setup as AIRPORT locations and they will behave the same way for ROAD transport. LINEHAUL between airports and between road hubs; TRUNK between airports and depots, and between road hubs and depots; RELAY between parks and depots; RADIAL for deliveries and collections.	Matthew Tipping
