| PAR.sql | Paragon Interface | 5.86 | 347017 | INC20228674 | 5 | When a radial trip is respun through paragon with collection orders. Then if later legs have already been planned then remove before re-spinning radial and then try to add back on again at the end. Also if delivery depot changed on a respin then always remove from all trunks before reprocessing so respin can re-assign to different cross-docks (or none) if required. | Agnieszka Trojak |
