EMERGENCY RELEASE - CTMS 11.0

RELNOTE ER027-048

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks	Reporter
DATA ADM SYSTEM PARAM_347880.sql	Data Script	1.1	347880	TID02 - FIAT UKMail	3	<p>The collection/job date for consignments will be offset by the required number of days: The greatest value of the new system parameter 'CARR_SRVCE_LEVEL_OFFSET_DAYS' for the cost centre of the order and the carrier service level of the route for the trip.</p> <p>Note that if the system parameter is not set, a default value of 1 day will be used to compare to the carrier service level.</p> <p>The calculated collection/job date will be moved backwards to the previous working day of the route.</p> <p>AAM is expected to set the carrier service level to 0 and the system parameter to 0: the collection/job date will then match the planned trip stop date for their overnight deliveries.</p> <p>HCR is expected to set the carrier service level to 0 but not set the system parameter and thus use the existing default value of 1 for the system parameter that will not be configured: the collection/job date will then be the previous date to the planned trip stop date for their next day deliveries.</p>	Dave Meir

						Therefore, no setup changes will be required for HCR.
