EMERGENCY RELEASE - CTMS 11.0

RELNOTE ER028-058

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks	Reporter
DP_INT_TMS_WMS_IN_STUB.sql	TMS-WMS Interface	1.8	350632	-	3	The WMS-TMS interface will set the current location of the order items when the corresponding sales order is pick confirmed and/or pack confirmed. The current location will be obtained from the bay number of the despatching trip or by default from the WMS parameters called DEFAULT_BAY_LOCATION. This default parameter will need to be created for the despatching depot with a valid grid location that is known as a WCS location.	Dave Meir

New Parameters			
Parameter Name	Config Level	Setting Value	Result
DEFAULT_BAY_LOCATION	WMS Interface	A WCS 'grid' location	This default location will be used for the current location of the order items when they are created via the 'MAR' and 'PACK' messages in the WMS-TMS interface should the despatching trip not have a bay location.
DEFAULT_BAY_LOCATION	WMS Interface	NULL	No default value will be available
