EMERGENCY RELEASE - CTMS 11.0

RELNOTE ER028-068

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks	Reporter
TRG_SOI_DESP_BAY.sql	Database Trigger	5.4	350849	-	3	The current location of the order items will be updated to the despatch bay for the trip as advised for loading. WCS will be informed in which depot the loading will occur, the latest trip in a depot that contains the despatch bay will be used. The latest trip being a trip that has not been given an actual departure time from the depot. This is to ensure that the depot is identified should the order be cross-docked through multiple depots and the same despatch bays are being used in those depots.	Paul Roscoe
