1 CTMS Common Fixes

1.1 CTMS Fixes

1.1.1 Scheduler not running

When Scheduler Audit says:

PLS-00302: component 'FIXED_DROP_SCHEDULING' must be declared

The process has not been set up correctly.

Check table AUTO_SCHEDULING_ENGINE and make sure that the PROCEDURE_NAME value is correct.

1.1.2 Jobs not running

If jobs are not scheduling themselves, or rescheduling themselves after they run.

Problem is likely in the database. Check the following:

-- Jobs not running? Check the following:

```
select logins from v$instance; -- if not allowed, won't run jobs
```

```
select value from dba_scheduler_global_attribute where
attribute_name='SCHEDULER_DISABLED' -- if TRUE won't run jobs
```

```
select value from v$parameter where name='job_queue_processes'; -- if 0 won't run jobs
(most common)
```

```
alter system set job_queue_processes=20; -- Fix to above issue
```
