1 Introduction

This document describes the contents of this Aptean POD - *Calidus* Edition device release.

1.1 Platforms/Databases

The release will be tested against & supported only for the following platform/database combinations:

- Android O/S 4.4.x Kit Kat or higher on previously verified devices

1.2 Related Documents

None

2 User Notes

This is a release of the Apteian POD - Calidus Edition device application.

2.1 Released Incidents / Changes

This release contains the following fixes/changes:

376409 - Fixed issue with job not moving to signature when using consolidated containers.

Fixed an issue which was preventing the device from automatically moving on to job completion tasks (e.g. signature capture, job photos etc.) when the last container was completed if the jobs included consolidated containers, i.e. where the same container ID is used on two or more consolidated jobs and using a style which is set to use consolidated containers.

2.2 Setup

Details of any system setup required by either Apteian or Client.

By	Reference	Description
Client	Installation	The APK needs to be updated/installed on devices

2.3 User Instructions

User details and instructions of the new or changed process

Topic	Action	Description
None		

2.4 Performance Notes

It is not thought that this change will have any impact on performance although it is our recommendation that the performance of all areas of the application is validated during testing to ensure that performance is still good.

2.5 Related Releases

Android mobile device application release 4.5.0.0 must be active prior to this release.

2.6 Technical Changes & Special Notes

2.6.1 Technical Changes

The following technical changes have been made as part of this release:

1. Build APK, which needs to be installed on the device.

2.6.2 Special Notes

None
