# 1 Introduction

This document describes the contents of this Aptean POD - *Calidus* Edition device release.

## 1.1 Platforms/Databases

The release will be tested against & supported only for the following platform/database combinations:

- Android O/S 4.4.x Kit Kat or higher on previously verified devices

## 1.2 Related Documents

None

## 2 User Notes

This is a release of the Aptean POD - Calidus Edition device application.

### 2.1 Released Incidents / Changes

This release contains the following fixes/changes:

Bug 225081: EPOD updating delivery product issues

There was an issue which meant when a collection product had a zero planned quantity and then had an actual quantity set on the device the product quantity on any linked delivery product was not being updated. This update was working when changing the quantity on collection products which had a non-zero planned quantity.

This issue has now been addressed and setting a quantity on a collection product for which the planned quantity was zero will now update the linked delivery product (if there is one) in the same way as changing the quantity on a collection product which had a non-zero planned quantity would update the linked delivery product

### 2.2 Setup

Details of any system setup required by either Aptean or Client.

| By     | Reference    | Description                                      |
|--------|--------------|--|
| Client | Installation | The APK needs to be updated/installed on devices |

### 2.3 User Instructions

User details and instructions of the new or changed process

| Topic | Action | Description |
|-------|--------|-------------|
| None  |        |             |

### 2.4 Performance Notes

It is not thought that this change will have any impact on performance although it is our recommendation that the performance of all areas of the application is validated during testing to ensure that performance is still good.

### 2.5 Related Releases

Android mobile device application release 4.5.0.0 must be active prior to this release.

### 2.6 Technical Changes & Special Notes

#### 2.6.1 Technical Changes

The following technical changes have been made as part of this release:

1. Build APK, which needs to be installed on the device.

## 2.6.2 Special Notes

None
