2 User Notes

This is a release of the Aptean POD - Calidus Edition device application.

2.1 Released Incidents / Changes

This release contains the following fixes/changes:

CT Issue 317 Fixes to the following Fleet Inspection processes:

- Can't complete item
- Can't complete service after adding item to empty fleet inspection - crashes device
- Search vehicle - no model entry required
- Search vehicle - not saving mileage
- Search vehicle - not defaulting to Fleet Inspection
- Search Vehicle - Unit type not showing description

2.2 Setup

Details of any system setup required by either Aptean or Client.

By	Reference	Description
Client	Installation	The APK needs to be updated/installed on devices

2.3 User Instructions

User details and instructions of the new or changed process

Topic	Action	Description
Usage	Note	On a fleet inspection, the Services screen will always show all tabs, but will not allow the user to switch tabs until at least one item (vehicle) has been added to the service.

2.4 Performance Notes

It is not thought that this change will have any impact on performance although it is our recommendation that the performance of all areas of the application is validated during testing to ensure that performance is still good.

2.5 Related Releases

There are no related releases, although it is strongly recommended that EPOD server release 4.5.1.11 is released along-side this change, to enable previously released system functionality and essential bug fixes.
