Aptean

v4.05.00.74 User Release Notes

Aptean POD - Calidus Edition - Device Application

05/01/2022

Contents

1 Introduction

This document describes the contents of this Aptean POD - *Calidus* Edition device release.

1.1 Platforms/Databases

The release will be tested against & supported only for the following platform/database combinations:

- Android O/S 4.4.x Kit Kat or higher on previously verified devices

1.2 Related Documents

None

2 User Notes

This is a release of the Aptean POD - Calidus Edition device application.

2.1 Released Incidents / Changes

This release contains the following fixes/changes:

CTY Issue 342

- Uppercase vehicle ID when creating and finding vehicles on the mobile device. Previously this allowed upper and lowercase, which was causing issues. Now the device forces uppercase of all vehicle IDs.

CTY Issue 349

- Axle Type missing from device - when creating a new vehicle, the axle type was missing, which led to reduced functionality on the service report (i.e. all axles displayed as generic axles). This has now been resolved.

2.2 Setup

Details of any system setup required by either Aptean or Client.

By	Reference	Description
Client	Installation	The APK needs to be updated/installed on devices

2.3 User Instructions

User details and instructions of the new or changed process

Topic	Action	Description
Usage	Vehicle Search/New Vehicle	The application now enforces vehicles are created with uppercase vehicle IDs (reg or fleet numbers). As there is significant data already in the system with lower-case vehicle IDs, it should be noted that this data should not be used and cannot be used on the device when searching, although existing vehicles with lowercase IDs can be used if selected from the list.

2.4 Performance Notes

It is not thought that this change will have any impact on performance although it is our recommendation that the performance of all areas of the application is validated during testing to ensure that performance is still good.

2.5 Related Releases

There are no related releases, although it is strongly recommended that EPOD server release 4.5.1.11 is released along-side this change, to enable previously released system functionality and essential bug fixes.

2.6 Technical Changes & Special Notes

2.6.1 Technical Changes

The following technical changes have been made as part of this release:

Ready for **What's Next, Now**™

1. Build APK, which needs to be installed on the device.

2.6.2 Special Notes

None

Ready for **What's Next, Now**™
