1 Introduction

This document describes the contents of this Aptean POD - *Calidus* Edition device release.

1.1 Platforms/Databases

The release will be tested against & supported only for the following platform/database combinations:

- Android O/S 4.4.x Kit Kat or higher on previously verified devices

1.2 Related Documents

None

2 User Notes

This is a release of the Aptean POD - Calidus Edition device application.

2.1 Released Incidents / Changes

This release contains the following fixes/changes:

CTY Issue 376

- Fixed an issue where an additional job added to a load does not display removed products correctly.

2.2 Setup

Details of any system setup required by either Aptean or Client.

By	Reference	Description
Client	Installation	The APK needs to be updated/installed on devices

2.3 User Instructions

User details and instructions of the new or changed process

Topic	Action	Description
Usage	Tyres (Service Products)	No changes

2.4 Performance Notes

It is not thought that this change will have any impact on performance although it is our recommendation that the performance of all areas of the application is validated during testing to ensure that performance is still good.

2.5 Related Releases

There are no related releases, although it is strongly recommended that EPOD server release 4.5.1.11 is released along-side this change, to enable previously released system functionality and essential bug fixes.

2.6 Technical Changes & Special Notes

2.6.1 Technical Changes

The following technical changes have been made as part of this release:

1. Build APK, which needs to be installed on the device.

2.6.2 Special Notes

None
