v4.05.00.79 User Release Notes

Aptean POD - Calidus Edition - Device Application

07/03/2023

Contents

1 Introduction

This document describes the contents of this Aptean POD - *Calidus* Edition device release.

1.1 Platforms/Databases

The release will be tested against & supported only for the following platform/database combinations:

- Android O/S 4.4.x Kit Kat or higher on previously verified devices

1.2 Related Documents

None

Ready for **What's Next, Now**™

2 User Notes

This is a release of the Aptean POD - Calidus Edition device application.

2.1 Released Incidents / Changes

This release contains the following fixes/changes:

CTY Issue 392

- Fixed creating inspections for added vehicle.

CTY Issue 394

- If vehicle selected from lookup, not allowed to change values

2.2 Setup

Details of any system setup required by either Aptean or Client.

By	Reference	Description
Client	Installation	The APK needs to be updated/installed on devices

2.3 User Instructions

User details and instructions of the new or changed process

Topic	Action	Description
Usage	Vehicle Search	When selecting a vehicle from a search, the details are displayed. You are not allowed to change the details, and the screen now does not allow this. This does not affect when adding a new vehicle from scratch (Add New). The device now uses the information from a searched vehicle to create inspections, including all product, size and pressure information from the last inspection.

2.4 Performance Notes

It is not thought that this change will have any impact on performance although it is our recommendation that the performance of all areas of the application is validated during testing to ensure that performance is still good.

2.5 Related Releases

Android mobile device application release 4.5.0.0 must be active prior to this release.

This is a stand-alone release and fix to the Android application and completely resolves issues 392 and 394 (whereby vehicle services supplied are now passed back to the server).

There are no related releases.

Ready for **What's Next, Now**™

2.6 Technical Changes & Special Notes

2.6.1 Technical Changes

The following technical changes have been made as part of this release:

1. Build APK, which needs to be installed on the device.

2.6.2 Special Notes

None

Ready for **What's Next, Now**™
