1 Introduction

This document describes the contents of this Aptean POD - *Calidus* Edition device release.

1.1 Platforms/Databases

The release will be tested against & supported only for the following platform/database combinations:

- Android O/S 4.4.x Kit Kat or higher on previously verified devices

1.2 Related Documents

None

2 User Notes

This is a release of the Aptean POD - Calidus Edition device application.

2.1 Released Incidents / Changes

This release contains the following fixes/changes:

672693 Device cannot send audits

- Fixed an issue that was preventing the device from sending the audit log via the webservice when the device did not have GPS coordinates.

2.2 Setup

Details of any system setup required by either Aptean or Client.

By	Reference	Description
None		

2.3 User Instructions

User details and instructions of the new or changed process

Topic	Action	Description
GPS	Info	To simulate/cause the device to not have any valid GPS coordinates you can turn off the location/GPS on the device (to ensure the device cannot get new coordinates) and wait 5 minutes (to ensure any coordinates the device has already retrieved are no longer valid/will not be used)

2.4 Performance Notes

It is not thought that this change will have any impact on performance although it is our recommendation that the performance of all areas of the application is validated during testing to ensure that performance is still good.

2.5 Related Releases

Android mobile device application release 4.5.0.0 must be active prior to this release.

2.6 Technical Changes & Special Notes

2.6.1 Technical Changes

None

2.6.2 Special Notes

None
