The release will be tested against & supported only for the following platform/database combinations:

- Android O/S 4.4.x Kit Kat or higher on previously verified devices

1.2 Related Documents

None

Ready for **What's Next, Now**™

2 User Notes

This is a release of the Aptean POD - Calidus Edition device application.

2.1 Released Incidents / Changes

This release contains the following fixes/changes:

657715: CTY - no DEL message sent for job 6538.

- A fix has been added for the possible situation where a mismatch between the service level status on the database and the data object could cause the device to count the service as an outstanding service on a completed job and so set the status that is returned to the server to D (causing the server to delete the service).

2.2 Setup

Details of any system setup required by either Aptean or Client.

By	Reference	Description
None		

2.3 User Instructions

User details and instructions of the new or changed process

Topic	Action	Description
None		

2.4 Performance Notes

It is not thought that this change will have any impact on performance although it is our recommendation that the performance of all areas of the application is validated during testing to ensure that performance is still good.

2.5 Related Releases

Android mobile device application release 4.5.0.0 must be active prior to this release.

2.6 Technical Changes & Special Notes

2.6.1 Technical Changes

None

2.6.2 Special Notes

None
