2 User Notes

This is a release of the Aptean POD - Calidus Edition Test environment at Aptean.

2.1 Released Incidents / Changes

This release contains the following fixes/changes:

520108 - GW Pod note

- Changed Grant Westfield POD note to include new footer logo and new Terms and Conditions text.

588002 - TTM export

- Don't send STOP_ACTUAL_ARRIVAL_DATE for OIT messages to TTM.

585171 - POD notes

- Fix to pod notes for configurable format to prevent missing product lines.

566901 Epod Import - Duplicate jobs

- Fixed check for duplicate jobs without a Job Code being passed in.

323200 Job Swap Messages - Sequences

- When processing a Job Swap message from the device, fix to generate unique job sequence values correctly.

Job Address Import - Address Name size increase

- When importing loads and jobs, the address name size has increased to 100 characters

MLP pod note format

- Removed Qty from weight calculation for the MLP pod note format.

File Exports - Added Ftps

- Development to add SSL to ftp for exports.

MLP pod note format

- Removed Qty from weight calculation for the MLP pod note format.

Fix for imports - Close connections correctly

- Bug fix to close connections correctly for imports in case there are multiple threads.

Fix for webservices - Load deletion

- Allow for loads to be deleted correctly if a blank load start planned date was passed in.

493480 - Load screen date search

- Default the data range search based on the last date range used when you re-enter the loads screen.

BRC Issue 37 - Show address not postcode

- Bug fix to the Job Sequencing screen - the screen now shows the full address if there is a job address without duplicating line 2 of the address.

BRC Issue 39 - Auto Email

Ready for **What's Next, Now**™

- Added some more debug messages to Auto-Export emailing process when there has been an error sending emails.

BRC Issue 26 - Auto-emailing reports.

- With this change, TLS1.2 is enabled for automatic emailing through email servers where SSL is enabled.

This release also includes a data implementation script for BRC to set up the system data as required by the customer.

BRC Device product display.

- Changed style to display job sequence on products list.

BRC Issues 31 and 32 - Job Assignment screen.

- Remove Add All button and show job address rather than just postcode .

BRC Issue 29 - Transport Job creation.

- Copy Final delivery address to transport job..

BRC Issue 35 - Job Sequencing.

- Change to list jobs by sequence.

BRC Issue 6 - consolidated jobs.

- Fix job consolidation by not updated the linked id on the server unless the job is complete.

BRC Issue 13 - fixed search in Job Assignment screen.

- Change to filters in job assignment screen.

BRC Issue 14 - Job Assignment added Save and Exit option.

- New option to Save and Exit when changes are saved.

BRC Issue 16 - Job Sequencing.

- Change to generate sequences differently when creating transport trip.

2227783 - Grant Westfield POD note.

- New Grant Westfield POD note.

440290 - BRC - Added Loose Products label to Containers screen.

- Added terms across the board; Display "Loose Products" when a loose products container.

440290 - BRC - Email export.

- Added Email_Server_User parameter to all email sends, and set TLS1.2 for SSL sends (most modern standard).

279355 - Job Id generation.

- Changed the system to allow jobs ids to be generated using a sequential number sequence stored on a new EPOD_LAST_NUMBER table. This is controlled using a UseLastNumbers webconfig flag. Caution should be taken when switching it on to ensure the value on the EPOD_LAST_NUMBER table is higher than the already existing job id for that site.

440290-05 - BRC Transport Jobs change.

- Change request to generate loads and jobs for the transport site based upon loads and jobs entered in the warehouse site. Warehouse and transport loads are linked using new linked load functionality added to the load

Ready for What's Next, Now™

header screen. Xml imports have also been changed to allow an EPOD_JOBS_UPDATE message type to be passed in.

440290-04 - BRC Load Maintenance/Job Assignment.

- New Site flags and System Parameter records to set default planned start and end dates for the load for the day. Open the Job Assignment screen automatically after creating the load etc.

296832 - Site cleardown script.

- Internal script written to allow test sites to be cleared down quickly.

277576 - Linked jobs Job Instructions.

- Fixed to preventing Job Instructions from being set to blank on the original job when creating a linked job in the job details screen.

253556 - Export Maintenance screen.

- Allow entry into the Message Type field for new TTM exports.

271367 - Vehicle Checks.

- Allow setting of resolution notes for Vehicle Checks at status 'Defect'.

273319 - Message Process

- Fix the setting of parameter strings. For job updates, the setting of the load status to 'Complete' was failing for load ids of more than 10 characters.

253556 - Export Maintenance screen.

- Allow entry into the Message Type field for TTM exports..

252598 - Job Maintenance.

- Fix to prevent the customer name from being set to blank when the job is edited.

262648 - Palletforce Export

- Fix to exception handling for Palletforce export to prevent export crashing when trying to record an exception. Mark failed jobs as being failed to prevent them being reprocessed. For the Job Trigger, the check for container records being at completed status has been removed.

265770 - Database initial creation script.

- Fix to remove incorrect property setting.

256607 - Product creation.

- Fix to create products correctly. Prevent null insert error.

521207 - Hewicks - Amalgamation of Business updates

- Various changes for Hewicks. Display last 3 loads on the POD note. Changed label from "Web:" to "Email:" on the POC note.

213465 - Further OWASP fixes.

- Fixes to file uploads for Customer Maintenance, Product Maintenance, Codes Maintenance, User and Vehicle Maintenance. Fix to Job screen when adding expenses.

356892, 229608 - Fix to stored procedure.

- Fix to stored procedure to prevent the release process from crashing.

Ready for **What's Next, Now**™

231070 - TTM Export

- Fix to TTM Export. Amended ProcessJobLockRequest to produce correct OIT/ARR message types. If Arrivals not is use, ARR produced after job lock.

236798 - Import/Export Audit screen.

- Fixed default sort order of records displayed to be by Request Date/Time descending.

237127 - TTM Exports.

- Fix to update the TTM export flag against the job differently at the end of the export process.

238366 - added extra auditing for job exports.

- Added extra auditing for ftp Job exports.

01805061 - Email export.

- Added 'Auto Email Job Type' to Job Group and Site Maintenance screens. Allows filtering of Job Types for the Auto Email export process.

213465 - OWASP security fixes.

- Fix for POD Reports to prevent xss cross-site scripting issues.
