# 1 Introduction

This document describes the contents of this Aptean POD - *Calidus* Edition admin and server release.

## 1.1 Platforms/Databases

The release will be tested against & supported only for the following platform/database combinations:

- Windows Server 2008 or above using SQL Server 2008/2012.
- Internet Explorer version 9.0 (and above) with JavaScript and Cookies enabled.
- FireFox version 26 (and above).
- Chrome version 32. (and above).

## 1.2 Related Documents

None

## 2 User Notes

This is a release of the Aptean POD - Calidus Edition Test environment at Aptean.

### 2.1 Released Incidents / Changes

This release contains the following fixes/changes:

279355 - Job Id generation.

- Changed the system to allow jobs ids to be generated using a sequential number sequence stored on a new EPOD\_LAST\_NUMBER table. This is controlled using a UseLastNumbers webconfig flag. Caution should be taken when switching it on to ensure the value on the EPOD\_LAST\_NUMBER table is higher than the already existing job id for that site.

440290-05 - BRC Transport Jobs change.

- Change request to generate loads and jobs for the transport site based upon loads and jobs entered in the warehouse site. Warehouse and transport loads are linked using new linked load functionality added to the load header screen. Xml imports have also been changed to allow an EPOD\_JOBS\_UPDATE message type to be passed in.

440290-04 - BRC Load Maintenance/Job Assignment.

- New Site flags and System Parameter records to set default planned start and end dates for the load for the day. Open the Job Assignment screen automatically after creating the load etc.

296832 - Site cleardown script.

- Internal script written to allow test sites to be cleared down quickly.

### 2.2 Setup

Details of any system setup required by either Aptean or Client.

By	Reference	Description
None		

### 2.3 User Instructions

User details and instructions of the new or changed process

Topic	Action	Description
None		

### 2.4 Performance Notes

It is not thought that this change will have any impact on performance although it is our recommendation that the performance of all areas of the application is validated during testing to ensure that performance is still good.

### 2.5 Related Releases

Android mobile device application release 4.5.0.0 must be active prior to this release.

### 2.6 Technical Changes & Special Notes

#### 2.6.1 Technical Changes

The following technical changes have been made as part of this release:

1. Full EPOD Server Release

## 2.6.2 Special Notes

None
