- FireFox version 26 (and above).
- Chrome version 32. (and above).

1.2 Related Documents

None

2 User Notes

This is a release of the Aptean POD - Calidus Edition Test environment at Aptean.

2.1 Released Incidents / Changes

This release contains the following fixes/changes:

588002 - TTM export

Don't send STOP_ACTUAL_ARRIVAL_DATE for OIT messages to TTM.

585171 - POD notes

Fix to pod notes for configurable format to prevent missing product lines.

2.2 Setup

Details of any system setup required by either Aptean or Client.

By	Reference	Description
None		

2.3 User Instructions

User details and instructions of the new or changed process

Topic	Action	Description
None		

2.4 Performance Notes

It is not thought that this change will have any impact on performance although it is our recommendation that the performance of all areas of the application is validated during testing to ensure that performance is still good.

2.5 Related Releases

Android mobile device application release 4.5.0.0 must be active prior to this release.

2.6 Technical Changes & Special Notes

2.6.1 Technical Changes

The following technical changes have been made as part of this release:

1. Full EPOD Server Release

2.6.2 Special Notes

None
