1 Category:CTMS ER

This page contains a list of CALIDUS TMS Emergency Releases.

Each emergency release is categorised into the System and Patch on which the ER was applied. So, ER CTMS 037-001 is the first release *on top of* CTMS PATCH 037.

Any releases on top of a patch will then be rolled up into the NEXT patch. In the example above, any programs included in the ER will form part of the next CTMS PATCH 038.
