EMERGENCY RELEASE - CTMS 11.0

RELNOTE ER038-043

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
TRM.sql	Trip Management Package	5.202	01619171	-	3	The calculation for the distance and time for trip stops has been amended. Cross-docked orders from a collection location will retain the fixed stop times when they are set and non-fixed trip stops will perform the calculation. If the collection trip contains a fully scheduled order that has been planned for cross-docking, new orders can be planned on that trip. Auto-planned orders will continue to use the time windows for their trip stops when advised.

New Parameters			
Parameter Name	**Config Level**	**Setting Value**	**Result**
EPOD_JOB_RETAIN_TIMES	COST_CENTRE	Y	Only updates the actual stop times when they are not set.
EPOD_JOB_RETAIN_TIMES	COST_CENTRE	N	Updates the actual stop times.
LOTS_SEND_WHEN_VEHICLE_SCANNED	COST_CENTRE	VLI,VLD,VUI	The listed LOTS messages types will be held until a vehicle scan has been received for the order.
LOTS_SEND_WHEN_VEHICLE_SCANNED	COST_CENTRE	N	All LOTS message types will be sent without delay.
