

EMERGENCY RELEASE - CTMS 11.0

RELNOTE ER039-003

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
DP_MCS_SCANNING.sql	MCS Scanning Package	5.69	00218431	-	4	The goods receipt process will assess the reason code provided for when it has an 'at fault' code of 'LATE' to update the received items as late items. The reason codes will be assessed at the 'ITEM_NON_CON' level with the system parameter 'ORD_REASON_CODE_FILTER' to identify the 'at fault' code. This system parameter can have values of 'COST_CENTRE', 'CUST_GROUP' or 'BOTH' with 'BOTH' being the default value. For example, the cost centre of the trip in receipt can be assessed. A reason code for the cost centre or a generic reason code of '+' can apply when the system parameter is 'COST_CENTRE' or 'BOTH'.
