

EMERGENCY RELEASE - CTMS 11.0

RELNOTE ER041-008

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
DATA_ADM_SYSTEM_PARAM_01929119.sql	Database Script	1.1	01929119	-	3	<p>CTMS</p> <p>A new system parameter called 'OMS_INVALID_SAME_LOCS' can be set to 'Y' or 'N' (default). If 'Y', the order status will be 'INVALID' when the 'from' and 'to' locations are the same for master or child locations. The user will be warned when an order is entered in the 'Orders' screen and the locations are the same. Labels will account for any contacts for the order when the 'from' and 'to' locations. One label will be printed per item with the first contact included for the 'to' location.</p> <p>Portal</p> <p>Added check to OMS_INVALID_SAME_LOCS - if N then same allowed. If Y then Portal will give an error if user enters same to/from location. Checked printing labels OK with same location selected and multiple contacts. Amended Order Receipt to use Aptean logo instead of OBS.</p>
