EMERGENCY RELEASE - CTMS 11.0

RELNOTE ER041-028

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
DATA_ADM_SYSTEM_PARAM_261979.sql	Data Script	1.1	261979	440451-26	2	Updates from EPOD: A new system parameter called 'EPOD_COMPLETE_ON_LOAD_UPDATE' can be configured by cost centre to enable the trips to be set to status 'COMPLETED' for a load update. The system parameter 'EPOD_COMPLETE_ON_RTD' should be set to 'N' when 'EPOD_COMPLETE_ON_LOAD_UPDATE' is set to 'Y'. The trip status will not be updated to 'COMPLETED' except when updating loads when 'EPOD_COMPLETE_ON_LOAD_UPDATE' is set to 'Y'. Trip planning from CTL: The orders will be added to the trips for delivery. The driver, carrier and vehicle will be validated that they are active and for their combination.

Ready for **What's Next, Now**™

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
						Any advised trips for the order must have the same driver, carrier and vehicle for the order to be added to that trip. The trips will have a shift for the driver if the order is being delivered within that shift and the driver does not have a planned diary exception for that time (e.g. for annual leave or sickness). These trips will have start and end times for the times for the shift. The trips will have a diary exception for the driver outside of the shift for the driver (e.g. overtime). These trips will have start and end times for the times for the diary exception. If an order is being planned outside of a shift for the driver and without a diary exception (e.g. overtime), the trip will have start and end times based on the standard distance and time calculations based on the time windows for the order.
