EMERGENCY RELEASE - CTMS 11.0

RELNOTE ER041-059

Module	Program Name	Ver	Call/Iss	Client Ref	Pr'ty	Remarks
DATA_IMP_FIELD_02023242.sql	Database Script	1.1	02023242	-	3	The creation of a tracking reference is audited when a label is printed for the order, and the deletion of a tracking reference is audited for the order. The 'CARRIER_POD' type of import will include new columns of data to extract from the file for the format that is being used: POD_NAME TRIP_ID REASON_TEXT The 'DELIVERED' field should be 'FIXED' to 'Y' to enable only the 'Delivered' events to be processed in the message. The 'LFE POD' message contains validation of the size and type of the data. The delivered tracking reference must exist for the advised order reference. The order lines will be updated as delivered as they have been packed and despatched.
